

No more Bending, Just effortless Cleaning for your Industrial Space

S3

▼ PRODUCT FEATURES

[Excellent performance, safe and reliable]

- ✓ Adopting a fully sealed structure design, it not only has high performance and long life, but also achieves excellent performance without pollution and maintenance. Continuous and stable operation of the equipment can be ensured without frequent maintenance and replacement.

[Efficient filtration, spotless]

- ✓ The filtration system adopts a plate filter element integrated with imported highly breathable fiber material, which has a large filtration area and excellent absorption effect. Whether it is fine dust or large particles of impurities, they can be effectively captured to ensure the purity of the air in the clean space.

[Strong suction, nowhere to hide]

- ✓ Adopting advanced suction turbine technology, it has strong suction, even dust and impurities hidden deep in corners can be easily sucked, leaving no dead corners to make cleaning work more thorough and efficient.

[Intelligent control, easy to use]

- ✓ Equipped with a multi-function operation panel, all buttons are reasonably laid out, clear at a glance, and independent operation is simple and convenient. Whether it is starting, adjusting suction, or switching cleaning modes, it can be easily mastered, making cleaning work easy and smart.

▼ PRODUCT PARAMETERS

parameter category	parameter	parameter category	parameter
Cleaning width	1000 mm	Rolling brush motor power	150 W
Rolling brush width	435 mm	Side brush motor power	38 W*2
Side brush width	400 mm*2	Driving motor power	/
Continuous running time	4-6 h	Debris hopper capacity	25 L
Theoretical cleaning efficiency	4900 m ² /h	Water tank capacity	12 L
Battery capacity	12V100Ah	Total weight	94.5 Kg
Suction motor power	100 W	Product size	1000*1000*600 mm

▼ PRODUCT FUNCTION IDENTIFICATION

▼ APPLICABLE GROUND

Asphalt pavement

Cement pavement

Plastic pavement

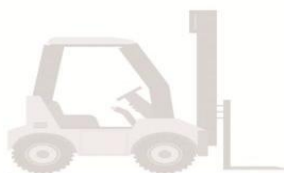

Granite pavement

Rough stone pavement

Brick pavement
